### **Pagina Principal:**

NutriPharCo is a biotech company born to provide active pharmaceutical ingredients supply solutions for the global pharmaceutical, cosmetic and food industries. We offer products complying with the highest and most prestigious quality standards worldwide, EU GMP.

Our hybrid society aims to merge the agricultural industry in one of the most fertile sectors for cannabis cultivation, with our state-of-the-art extraction plant and laboratory, in which we will have a clean and efficient process.

### **FROM SALTO TO THE WORLD**

We work together with local producers, families with long years of experience in the agricultural and horticultural area. Adding the experience, with the ideal natural resources that the land and climate of this area offer us, we guarantee the quality of the crops through 100% clean processes.

Uruguay was the first country in the world to recognize both the economic and health benefits of the cannabis plant, being the pioneers in the implementation of cannabis consumption laws.

---

Salto has the perfect climate conditions for cannabis, or any other plant. The levels of annual precipitation and solar radiation are optimal for the healthy growth of the plant, guaranteeing the quality of our inputs.

We work with a team of highly experienced farmers who are experts in the art of floriculture.

### **Excellence is the product of rigorous controls / rigorous control is a cause of excellence**

As the cannabis market is growing, it is noteworthy a higher demand for quality, purity, and safety. Quality control testing for cannabinoids is essential for the accurate analysis of cannabis-derived products for pharma, medical, nutraceutical and cosmeceutical use.

Accurate determination of cannabinoid concentrations is the most important component of cannabis testing solutions and implies sensitive techniques and technologies to analyze all of its ingredients. Moreover, cultivars of cannabis can be distinguished by profiling cannabinoid and terpene content.

At NutriPharCo we carry several strict quality controls throughout the entire production chain, obtaining sensitive information to place ourselves in a position of continuous improvement. Giving our clients the security and commitment that the global industries require.

## **About us:**

FRASE (OPCIONES):

**Imagen 1: The new path to sustainable medicine and biotech cannabis development**

**Imagen 2: Guaranteeing the supply of this growing industry**

**Imagen 3: Providing confidence through qualities of excellence**

**Imagen 4: The earth gives us resources, we take care of them.**

## **Who we are and what we do**

We are a biotech company that has paved the way for the possibility of new natural alternative medicines for society. We work together with local families with years of specialization in the art of cultivation, ensuring the quality of our products.

1. Production:  
Large volumes of active pharmaceutical ingredients, with high contents of cannabinoids.
2. Research and development:  
The industry is developing, with less than 40% of the plant's active cannabinoids being known. We work to provide the industry with new opportunities and applications, generating demand with the availability of new developments analyzing different cannabinoids and by-products whenever the industry requires them.

## **Mision**

Supply the pharmaceutical, nutritional and cosmetic industries with the highest quality of active pharmaceutical ingredients on the market, complying with the strictest quality standards globally.

## **Vision**

Contribute, from a productive and research side, to the development of alternative foods and medicines for the society of the future that seeks an evolutionary advance in the field of natural health.

## **Values**

Responsability: Responsibility towards the environment, and complying with the quality of our products for society.

Transparency: Clarity in the transfer of product and analytical information

Efficiency: Our compound of technologies define our efficiency in terms of production and costs

Innovation: R&D department is constantly searching for new applications and opportunities for the industry

Know-how: Our eclectic team brings together years of experience in every area of the production chain.

## **Environmental Responsibility**

Our business vision integrates respect for people, ethical values, the community and the environment with the management of the company itself. It leads us to the conscious and committed action of continuous, measured and consistent improvement that allows the company to generate added value for all its publics, and thereby be sustainably competitive.

Respecting the environment its not enough, but also allowing a healthy life for society. That is why at NutriPharCo we not only take care of the environment with clean processes, but we also offer a sustainable and natural product to improve people's quality of life.

## **Products and Services**

### **Ingredientes activos (API's):**

Our ingredients comply with the highest quality standards worldwide, transmitting safety and reliability to all our customers.

### **CBD FULL-SPECTRUM OIL**

#### **<0.3% THC**

Our most raw and beneficial form of extract. With high concentrations of CBD and the presence of terpenes, flavonoids, and other cannabinoids such as THC, CBG, and others, our end product guarantees an effective reaction thanks to the synergistically work of the compounds, creating the entourage effect. Our full spectrum oil meets the regulatory THC complaints.

### **CBD BROAD-SPECTRUM OIL**

#### **0% THC**

Our broad spectrum oil has a high content of CBD, a moderate presence of CBG and other minor cannabinoids. We guarantee THC levels below 0.1%, ensuring worldwide marketing. THC mitigation is reached by our highly efficient remediation processes, assuring low CBD loss rate.

### **CBD DISTILLATE**

#### **70% - 80% CBD | 0% THC**

Our CBD distillate is the end product of a sophisticated refinery and decarboxylation process, using solvent extraction, taking care of the quality and integrity of the product. It has the presence of terpenes and other minor cannabinoids.

### **CBD ISOLATE**

#### **<98% CBD | 0% THC**

Key ingredient for the production of many pharmaceutical products, extracted in rooms with highly controlled area classification under the highest quality standards worldwide.

Recognized for its purity and consistency, our isolate is prepared to supply the most quality demanding laboratories.

### **BLEND AND CUSTOM FORMULATIONS**

NutriPharCo not only focuses on the scale, quality and consistency of our products but we are fully equipped to reliably develop, produce and deliver custom extraction solutions for our customers.
